

Animal Comfort

Better comfort. Designed for animal well-being.

Our Setex® foam solutions

What we do

BPI develops tailored Setex® foam solutions for integration into animal comfort systems. From reliable high-density support to premium Visco-enhanced comfort and customised material combinations, our focus is on creating foam solutions that match the customer's system, performance requirements and development goals.

With flexible material and processing options, Setex® can be developed to support both everyday performance and more advanced comfort concepts.

1. Standard Setex® foam

Reliable, high-density support

- › Stable and durable support
- › Designed for repeated loading
- › Custom dimensions
- › Reliable bonded foam solution

2. Premium Setex® with Visco

Enhanced comfort

- › Softer, pressure-relieving initial feel
- › Tailored visco content, density, and firmness
- › Performance confirmed through testing

3. Tailored foam combinations

Customised system performance

- › Multi-layer foam construction
- › Integrated support and comfort zones
- › Sloped designs, system-specific fit
- › Optional protective wrapping

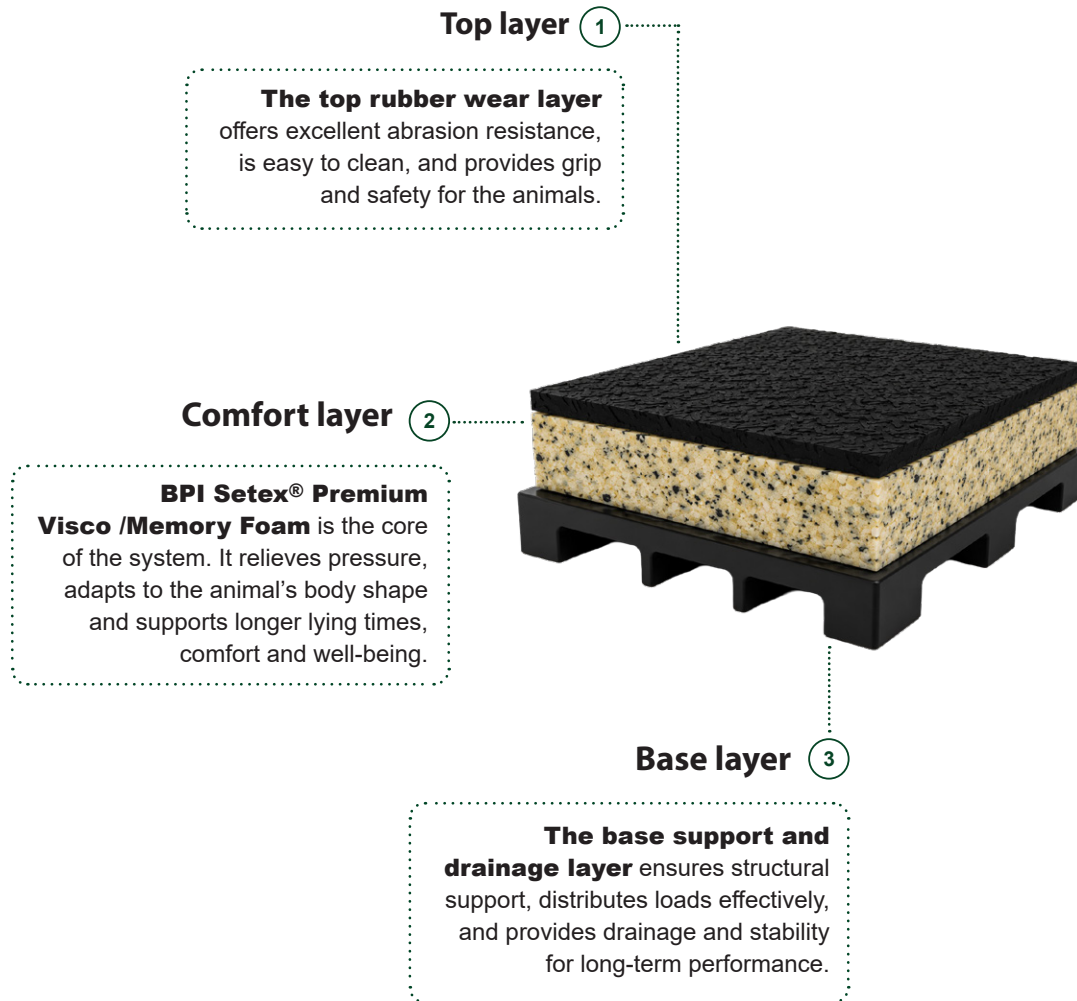

Your
development
partner, not just a
material supplier.

Setex® Post-Consumer Solutions

Every year, more than 40 million mattresses are landfilled or incinerated across Europe.

BPI gives this PU foam a new purpose by transforming it into high-quality bonded foam for new applications.

Through our in-house process, post-consumer foam is dismantled, cleaned, granulated and bonded into new material. The result is a durable and versatile foam solution available in a range of densities.

Why Choose Setex® ?

Designed for the daily reality of dairy and livestock barns - moisture, weight, constant use - Setex® gives animals a surface that stays supportive and clean, shift after shift, year after year.

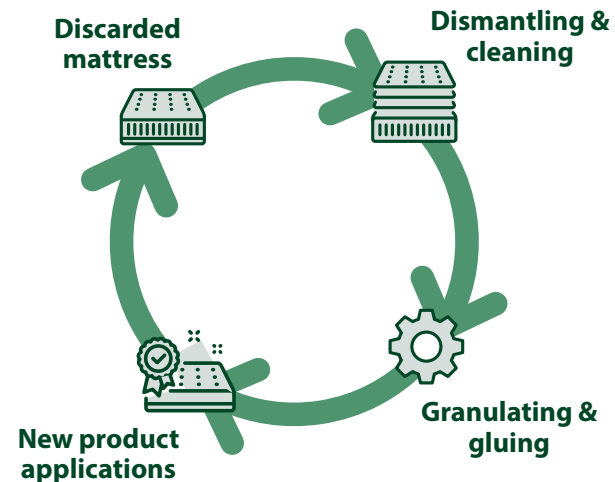

- › Supportive and comfortable surface
- › Designed for repeated daily use
- › Available in different densities and dimensions
- › Consistent quality and reliable supply
- › Supports long-lasting animal comfort systems

Improving Animal Comfort Where It Matters Most

Developed to withstand the demanding conditions of daily barn operations, Setex® combines durability and performance.

Its properties support animal welfare while helping farmers maintain clean, functional, and long-lasting installations.

From mattress waste to new foam

Let's develop the right solution for your application

Why work with us?

Our solutions help improve animal comfort while supporting both new product development and the optimisation of existing designs.

With in-house R&D, laboratory testing and material expertise, we help develop and validate solutions that balance comfort, durability and performance.
